Your Full-Service Pharmacy

Ophthalmology

The pharmacy

Quality is our highest priority – this is the reason why our quality management in all work areas is

DIN EN ISO 9001:2015 certified. The production in the sterile laboratory follows GMP guidelines.

The continuing education of our employees, the commitment to the optimal care and education of our patients, and the use of the latest technology and software are the focus of our continuous pursuit of excellence.

Over 100 professional employees are serving our customers in the following areas:

- Four community pharmacies
- Ophthalmology
- Hospital supplies
- Cytostatics production
- Industrial plant supplies
- Long-term care facilities
- Mail order business
- Emergency services
- Rehabilitation Centers
- Palliative care

Ophthalmology

We are an international partner of many eye centers, practice clinics, and larger eye-care centers. Our speciality is intravitreal drugs for retinological therapy, including the respective billing and accounting services. As a delivery pharmacy, we meet the required specifications of all BDOC (German Eye Surgery Association) and health insurance contracts.

Benefits for your practice

Order process:

- Storage and supplies remain in the pharmacy. Needs-based short-term delivery reduces your storage and handling costs
- For larger customers, the establishment of a commission warehouse on site to facilitate the ordering process is possible
- Immediately after the order, we prepare patient-specific and surgery relevant prescription drugs in the sterile laboratory. Orders placed until 10 o'clock are delivered by noon on the following day or on your desired scheduled delivery date. (Available coordination Mondays to Fridays; Saturdays only in exceptional cases)
- Delivery under complete consideration of the medication cold chain
- Maximum flexibility in surgical planning
- Personal care and availability 24/7 via emergency number
- Connection to electronic ordering practice software (orgoplan med) possible

Accounting:

- Accounting according to your content specification
- Direct billing with patients and health insurance possible
- Coordination for direct billing with health insurance enables patients to more easily manage even the most expensive therapy costs
